

DRUMJET BLASCON

ROBOTIC HIGH PRESSURE
DRUM MIXER CLEANING

BLASCON

No human entry required.

Regular routine cleaning of your truck mixer drums with the robotic Drumjet system will prevent the need for unnecessary human entry into the mixer drum, to remove the hardened concrete build up which has accumulated over time..

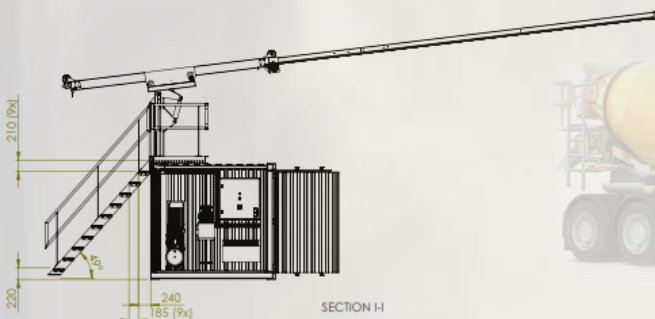

Compact and Simple to Use.

The containerised Drumjet washing system is compact, robust and simple to use and will provide a cost effective solution for your regular routine cleaning of your concrete truck mixer drums.

High pressure concrete cleaning.

The Robotic high pressure lance provides sufficient water pressure to remove the concrete which has been left behind after your daily deliveries and ensures your drum is clean and clear of concrete ready for your next deliveries.

Up to 90% reduction in hardened concrete build up

Plug & Play with Remote Control.

The Drumjet system is portable and quick and easy to install and operate, due to the state of the art plug and play technology and remote control operating system..

Comprehensively equipped and Fully Automated.

The containerised Robotic Drumjet is fully automated for quick and easy operation and can be configured with the Drumjet vehicle recognition system to speed up the transition between vehicles.

Safe & Reliable

The Drumjet high pressure cleaning system, provides a robust, safe and reliable solution, for regular routine cleaning of all types of truck mixer drums without the need for human entry.
